## **Course Description: Human-Computer Interaction**

(SYST 469-002; Spring 2013)

Instructor: Professor Leonard Adelman Office: Engineering Bldg, Room #2223; Phone # 703-993-1624 Office Hours: Thursdays, 3:30 - 4:10 (or by appointment) E-Mail Address: <u>ladelman@gmu.edu</u>

> **Teaching Assistant**: Ms. Rachana Rao E-Mail Address: <u>rrao7@gmu.edu</u> Office: Engineering Bldg., Room #2216 Office Hours: Thursdays, 2:00 – 4:00

**Text**: Y. Rogers, H. Sharp, & J. Preece. *Interaction Design: Beyond Human-Computer Interaction* (3<sup>rd</sup> edition.). Wiley & Sons, 2011.

Prerequisites: IT 108 or IT 206 and STAT 250

**This course will cover the principals of human-computer interaction**: including information processing design, cognitive models, ergonomics, and design metaphors. Students will learn to evaluate interface design in terms of effectiveness, efficiency, and cost. (*Systems engineering majors can not take this course for credit toward their major. They need to take SYST* 470.)

## **Student Evaluation Criteria**

Three (3) Exams	75% (25% each)
Class Project	25%

I use the full grading scale, including pluses and minuses. In general, that means the following grading range: A ( $\geq$  90), B (80 to 89), C (70 to 79), D (60 to 69), and F (< 60). The exams will cover material presented in the text and class. The exams are closed-book and closed-notes. The exam questions probably will be short-answer in format. There will be a review period the session before the exams. Laptops can not be used to take the exams.

Students will work in pairs (of their choosing) to complete their project. The project needs to be an experiment evaluating two or more interactive products. Projects need to be guided by user requirements and usability goals, employ experimental design principles, and use statistical analyses to determine if there are significant differences in product usability. (Failure to use statistical analysis will result in a loss of at least two letter grades on the project.) Each team will make a 10-minute presentation describing their project. You should discuss your project with me to make sure it is acceptable. Students who present on April 25th will receive 2 additional points. So, a high A presentation could be worth 27 instead of 25 points, which could easily be the difference between a B+ or A- in the course. I will give date priority to students who need additional points.

I will take class attendance around the mid-point of every class, including exam days. Good attendance will be worth extra-credit points.

## SYLLABUS: Human-Computer Interaction (SYST 469-002, Spring 2013)

- Week 1 (1/24) What is Interaction Design? (Ch. 1)
- Week 2 (1/31) Understanding and Conceptualizing Interaction (Ch. 2)
- Week 3 (2/7) Cognitive Aspects (Ch. 3)
- Week 4 (2/14) The Process of Interaction Design (Ch. 9) & Review for Exam #1
- Week 5 (2/21) Exam # 1 at 4:30 (to 5:50) No Class After Exam
- Week 6 (2/28) Establishing Requirements (Ch. 10)
- Week 7 (3/7) Go Over Exam # 1 and Introducing Evaluation (Ch. 12)
- Week 8 (3/14) No Class: Spring Break
- Week 9 (3/21) Evaluation Framework (Ch. 13) and Review for Exam #2
- Week 10 (3/28) Exam #2 at 4:30 (to 5:50) & Evaluation Studies (Ch. 14)
- Week 11 (4/4) Go Over Exam #2 and the rest of Evaluation Studies (Ch. 14)
- Week 12 (4/11) Questionnaires (in Ch. 7) & Analytical Evaluation (Ch. 15 up to page 521)
- Week 13 (4/18) Design, Prototyping, and Construction (Ch. 11)
- Week 14 (4/25) Student Presentations
- Week 15 (5/2) Student Presentations and Review for Final Exam
- Week 16 (5/9, from 4:30 to 6:30) Final Exam

## **Additional Information**

- GMU is an Honor Code university
- Emails will be sent to your GMU email address
- Office of Disability Services: 703-993-2472 (http://ods.gmu.edu)
- Counseling & Psychological Services: 703-993-2380 (<u>http://caps.gmu.edu</u>)
- Writing Center: A114 Robinson Hall, 993-1200 (<u>http://writingcenter.gmu.edu</u>)
- University Libraries: <u>http://library.gmu.edu/mudge/IM/IMRef.html</u>
